1/1

Determination of WK coefficient

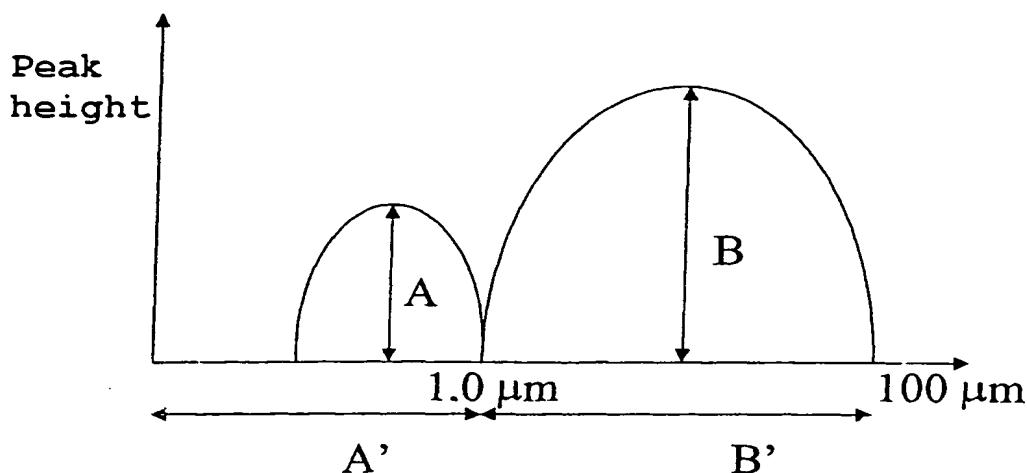

Fig. 1

5 $W_K = \frac{\text{Peak height (B) of the particles which cannot be broken down}}{\text{Peak height (A) of the broken - down particles}}$

$A' = \text{Range from } 0 \text{ to } <1.0 \mu\text{m}$

$B' = \text{Range } 1.0 \mu\text{m} - 100 \mu\text{m}$
